## What sets ABBHI apart from other Home Inspection companies:

- Every roof that can be walked will be walked during the inspection except where weather conditions and safety issues prevent it.
- Every attic and crawl space will be entered if at all possible.
- Thoroughness, a Home Inspection done by ABBHI takes a little longer than those done by other Home Inspection Companies. ABBHI takes the time to inspect the home as if ABBHI were buying the property. There are a lot of "wham-bam-thank you mam" home inspectors out there but ABBHI isn't one of them! Time is taken to provide the best possible Home Inspection for the client. ABBHI also takes the time to talk with the client and answer their questions. A lot of my clients have purchased homes in the past and had some other company do that inspection; they always comment favorably on how thorough the Home Inspection done by ABBHI was.
  - Free follow up inspections on items corrected as a result of an ABBHI inspection.
- Every Home Inspection conducted by ABBHI is done by a professional with a degree in Electro-Mechanical Engineering, with nearly 8 years experience as a Home Inspector and over 30 years experience in industry.
- Inspection reports emailed within an hour after the inspection, time permitting.
- New Home Inspection software which produces a very neat, easy to read, organized report for the client, complete with pictures!
